

Association of Diving Contractors International

Saturation Emergency Contact List

Gulf of Mexico

29 July 2019

Guidance Notes:

- 1. ADCI does not assume any liability for incorrect or incomplete listing of contractors.**
- 2. This document is intended to assist saturation providers with emergency planning and response for their respective companies. Saturation providers are encouraged to verify the numbers and contacts pre-job and incorporate this document in their emergency response planning. This listing should be considered as a starting point only and should not be considered complete and comprehensive. Listed contractors may not be offering all of their services when the emergency occurs and new contractors may have entered the theater on a permanent or temporary basis.**
- 3. Contractors receiving a call for assistance are requested to actively support the party in distress by making calls for them or volunteering information on additional options of which the party may not be aware.**
- 4. Contacts and numbers are valid as of July 29, 2019. Member companies are encouraged to notify the ADCI Executive Director or the Saturation Subcommittee Chairman of any changes, additions or deletions to this listing.**
- 5. In the event of an emergency, (i.e.: dropped bell), saturation companies are encouraged to consider all potential options including Atmospheric Diving Systems (ADS), Remote Operated Vehicles (ROV), and surface supplied mixed gas diving if applicable.**
- 6. Prior to commencement of diving operations and regularly throughout, it is highly recommended to review vessel Automatic Identification System (AIS) data to identify other vessels operating in the immediate range of your operations which may be capable of rendering emergency assistance.**
- 7. Saturation providers should be aware of the locations and availability of Hyperbaric Rescue Facilities (HRF) and their suitability with respect to mating of their Hyperbaric Rescue Chamber (HRC) or Self-Propelled Hyperbaric Lifeboat (SPHL). Providers are listed below for reference.**

Contractors – Service(s) Provided

Anchor Diving and Construction - SATURATION (Non-ADCI member)

Hydra Offshore – SATURATION (Non-ADCI member)

Charles Zamora	President - Anchor	713-834-7900
Rob Moro	Safety Manager- Anchor	504-635-9762
Daryl Walters	Project Manager - Hydra	832-499-2531

Aqueos Corporation – SATURATION - HRF

Travis Detke	VP of Operations	337-319-7507
Mark Wieneke	Director of Diving	337-552-4858
Jason Brink	Project Manager	713-309-5244

C-Dive, LLC - SATURATION

Chris Hale	Project Manager	832-257-7915
Ed Moorman	Operations Manager	504-220-3083
