Santos Melgar - Biography

Santos Bolívar Melgar De León is a Panamanian professional in the maritime and industrial sector, holding a degree in Industrial Engineering and a Master of Business Administration (MBA) obtained at the Universidad Latina de Panamá between 2017 and 2019. Born on June 3, 1984, he has an advanced level of English and complements his academic profile with extensive continuous technical training.

Since September 2012, he has been developing his career at Talleres Industriales, S.A., where he leads steel repair, piping, and general maintenance projects. Within the company, he has held various managerial positions, including Diving Division Manager, Commercial Manager, Oil Spill Division Manager, and Designated General Manager for periods in 2025 and 2026. As the Diving Division Manager, he coordinates national and international logistics to punctually execute underwater repairs and industrial projects.

Previously, he worked at Marine Engineers Corporation (Panamá) Inc. from January 2008 to July 2012 as Top-Side Repairs Division Manager and Operations and Engineering Assistant, handling project supervision, quotes, and metal mechanics and naval inspections. His operational beginnings date back to his time at MECSTORES S.A. (2006-2007), where he worked as a Boarding Officer and managed warehouse design and ship provisioning in the Panama Canal area.

He holds multiple high-level technical credentials, notably his certification as a Surface-Supplied Air Diving Supervisor and Diver by the Association of Diving Contractors (ADCI), international training in oil spill response (IMO Levels I and II), and certifications in welding, Kirby Morgan systems, hydraulic and pneumatic systems, and CNC machining. In the professional association sphere, he chaired the Panama Maritime Chamber Ship Repair Committee during the 2019-2022 period and serves as the President of the American Diving Contractors International (ADCI) Latin American & Caribbean Chapter for the 2025-2027 cycle.

Talleres Industriales, S.A. - Overview

Talleres Industriales, S.A. is a comprehensive marine and industrial service provider with over 57 years of experience, having been founded in 1969. From its strategic headquarters in Panama, the company operates and extends its capabilities to serve the global maritime industry worldwide.

The company offers a wide range of solutions, handling complex steel repairs, piping jobs, and general maintenance onboard ships for the local and international industry. A fundamental pillar of its operations is the Diving Division, which manages logistics to punctually execute critical underwater tasks without causing delays; this includes repairs on hull structures, rudders, and propeller blades, as well as in-water surveys and hull cleaning.

Additionally, it integrates advanced technology through the use of HullWiper Remotely Operated Vehicles (ROVs) for hull maintenance. Beyond structural repairs, Talleres Industriales has dedicated divisions for highly complex maritime scenarios, encompassing Ship-to-Ship (STS) transfer operations and a specialized Oil Spill Division focused on safety and environmental response.
